

## PRESIDENT'S PLAN FOR ARBITRATION

If He Determines to Arbitrate He  
Will Appoint a Board.

### CALVO DOCTRINE COMES UP

Best Right of Any Nation to Inter-  
vene Diplomatically in Behalf of  
Its Subjects Where Courts Exist.

Washington, Dec. 23.—The cabinet meeting today was prolonged more than two hours. All the members were present except Secy. Moody, who is out of the city. Secy. Root was first to arrive at the executive offices. He entered the office shortly after 10 o'clock. The president denied himself to all callers and remained in consultation with the secretary of war until the arrival of the other members.

Secy. Hay brought to the meeting practically nothing new relating to the situation. No response has been received to the president's original suggestion to the powers that they consent to the reference of the Venezuelan controversy to the arbitration of the Hague tribunal, and no formal request has been received for the president to act as arbitrator. That such a request will be received formally and officially is now practically assured.

It is known that the president and the members of his cabinet at first preferred that the question should be referred to the arbitration of the Hague tribunal. It is now known that the president's plan, if he knows that the arbitration, contemplates the appointment of a board of arbitrators, he would not concur in such an undertaking. Any one man, nor an undertaking of this nature, nor an examination in detail of each of the various claims that would be presented to the arbitration board, necessarily, the president's own arbitration board would include some members of a high order of legal talent as well as others thoroughly versed in the practice of international law.

It is said the crucial point before the arbitration board is the famous "Calvo doctrine." This doctrine, which has been down by the greatest of Italian-American international lawyers, and for very many years has been regarded as beyond question by all of the Latin-American republics, defines the right of the United States to intervene diplomatically in behalf of one of its subjects where the courts of the country are open to his application for justice. This doctrine has been asserted that all of the British, German, Italian and French, might have gone before the Venezuelan courts and, if their causes had been just and the government had paid the judgments. The objection to this view is that no account is taken of miscarriage of justice.

But so determined are the South American countries to adhere to this doctrine that some of them have gone to extraordinary lengths in their resistance of diplomatic efforts for redress of grievances. A notable case is that of Salvador. Recently a United States corporation obtained, after arbitration, a judgment against the government of Salvador. The verdict was received with intense indignation in Salvador, and so intense was the anti-foreign feeling excited that a law was passed which forbade the government to make any contract with a foreign corporation.

It is known now that some members of the cabinet are opposed to referring the matter to the Hague tribunal, and that the arbitration board proposal contains nothing that indicates that this doctrine is to be attacked, but so complex and numerous are the questions which will arise before the arbitrators that it is apprehended here that the famous doctrine scarcely can be kept from consideration.

Another reason that animates these cabinet officers in their distinction toward acceptance is their conviction that an inordinate length of time would be consumed if the issue is taken before the Hague tribunal. The machinery is sufficient, but ponderous and difficult to put in motion. First, there must be arranged a basis of arbitration, the arbitrators must be selected by the parties to the case and the arbitrators must choose an umpire or umpires, and while all this is going on, the blockade would continue with its ever present danger of active war and bloodshed, that might render void all attempts at arbitration. On the other hand, if the president undertakes the arbitration, he can get rid of all red tape and start the work of arbitration within a few days.

AS TO THE CALVO DOCTRINE.  
Detroit, Mich., Dec. 23.—Former Postmaster Gen. Don M. Dickinson of this city was one of the arbitration commission appointed to decide the Salvador case, referred to in a Washington dispatch. In fact, Mr. Dickinson was shown the points of international law involved in the Salvador case probably had the greatest weight in the decision referred to. When Mr. Dickinson was shown the Washington dispatch, he said:

"Calvo was a native of either Venezuela or Brazil and he laid down the doctrine that foreign nations have no right to interfere in behalf of their subjects in obtaining justice. This doctrine, either through diplomatic arrangements or other agreement, was adopted by all the Latin-American countries of South and Central America."

"In our decision of the Salvador case, Mr. Henry Strong and myself refused absolutely to recognize the Calvo doctrine. The position taken under this state makes a contract with an individual and a controversy arises between us as to the terms of the contract. It is ridiculous to assume that the sovereign has the right to sit as a court and end a quarrel in which it is itself a party."

"The doctrine will have to be abandoned by all countries that have taken it up, as all foreign nations will insist upon the right to be heard in their own courts."

### NOT DUE TO CLIMATE.

#### Catarh is Found Everywhere.

Catarh is at home anywhere and everywhere. While more common in cold, changeable climates, it is by no means confined to them, but is prevalent in every state and territory in the Union. The common definition of catarh is a chronic cold in the head, which if long neglected often destroys the sense of smell and hearing; but there are many other forms of the disease, even more obnoxious and dangerous.

Catarh of the eyes, throat, bronchial tubes as well as catarh of the stomach and liver are almost as common as the catarh of the head and generally more difficult to cure than the catarh of the head.

Dr. McVerney advises catarh sufferers to use a new preparation, sold by druggists, called Stuart's Catarh Tablets, because actual analysis has shown these tablets to contain certain anti-septic qualities of the highest value and being an internal remedy, pleasant to the taste, convenient and harmless, can be used as freely as required, as well for children as for adults.

An attorney and public speaker, who had been a catarh sufferer for years, says:

"Every fall I would catch a cold which would settle in my head and every winter it seemed to get a little worse. I was continually clearing my throat and my voice became affected to such an extent as to interfere with my public speaking."

"I tried troches and cheap cough cures and sometimes got relief, but only for a short time, until this winter when I started Stuart's Catarh Tablets, through a newspaper advertisement. Two first-class boxes which I bought at my drug-gist, cleared my head and throat in five days and my trouble I kept a box of the tablets on hand and whenever I catch a little cold I take a tablet or two and ward off any serious development."

Stuart's Catarh Tablets deserves to be the first as a household remedy, to check and break up coughs and colds, because unlike many other catarh and cough cures these tablets contain no opiate, cocaine or any injurious drug.

Upon the right to intervene in behalf of their subjects.

"Since the decision was rendered President Diaz of Mexico, one of the most capable executive officials in any Latin-American country, has decided a case involving \$2,000,000. On this decision he ignored the Calvo doctrine. President Diaz's position is a very important precedent and I expect that the belief of Latin-Americans that they can uphold the principle of the non-intervention will not last very long."

### VERY COLD IN DAWSON.

Mercury Goes Down 58 Degrees Below Zero.

Vancouver, B. C., Dec. 23.—Crown Prosecutor F. T. Congdon, who arrived today from Dawson, says the mercury at one time had reached 58 degrees below, but there had been very little snowfall. In spite of the extreme cold, the Yukon river opposite Dawson, and for a short distance up the river, was still open.

When asked about the newly discovered artesian stream at Bonanza creek, Mr. Congdon said that without doubt this subterranean water could be one of the greatest benefits to the mining industry in the vicinity of Moll Hill that had yet been discovered.

While sinking the shaft down to where the water was to be struck, two rich veins of pay dirt had been discovered, one at 25 feet and the other at 90.

### Englishmen Get American Patents.

Washington, Dec. 22.—The statistics of the patent office for the year ending Dec. 31 show that more patents have been issued to residents of England than to people in any other country of Europe. The patents issued to English inventors during the year numbered 399, with Germany next in rank, with 743.

### Smallpox Closes Iowa Schools.

Des Moines, Ia., Dec. 23.—The existence of numerous cases of smallpox in this city has caused the closing of the public schools in Iowa City, the seat of the state university, upon order of the state board of health. It is claimed no university student has the contagion, though it is feared some may have been exposed.

### Brother Slays Brother.

Brantford, Ont., Dec. 23.—Wesley Watson of Detroit was shot and killed by his brother Samuel at Middleport, near this city today. Samuel and James ran a farm near Middleport and the third brother, Wesley, lived in Detroit.

Last night Wesley came home unexpectedly. It is supposed to spend the Christmas holidays. The brothers at home, both men over 30 years of age, heard him approaching the house and became possessed of fear that they were about to be attacked by thieves. They ran upstairs and, getting out of a window, went to the house of a neighbor, where they spent the night.

They returned today, armed with a shotgun. Wesley had gone into the house, and finding no one there, went to the door of the room in which he had been sleeping. He raised himself in the bed, feeling to recognize his brother Samuel, and he heard him instantly. Recently the two men had been attacked by burglars.

### Idaho Mining Statistics.

Boise, Ida., Dec. 23.—State Mining Inspector Martin Jacobs estimates mineral production in Idaho for 1902 at \$10,323,271.33; gold, \$2,497,232.21; silver, \$5,235,583.62; lead, \$3,035,655.55. The copper production of the Seven Devils district was shut down all year on account of litigation between the owners and the other copiers. Property at Mackay, which has a 1,500,000 smelter, will not begin operation until next spring or summer. Of a total of 100,000 tons of lead-silver the total mineral output of the district was \$2,497,232.21.

## THEY WAIT ON

### MR. ROOSEVELT.

England Anxious to Know if He  
Will Be Arbitrator.

### REALIZES THE OBJECTIONS.

Preference for President is Sincere—  
No Utter Motives—Campbell-Sim-  
merman Criticizes British Govt.

New York, Dec. 24.—The decision of President Roosevelt respecting the Venezuelan arbitration has been awaited with keen interest in England, says a dispatch from London to the Tribune. The agency of the objections urged by the leading American journals is not denied, but there has been a sincere preference for Mr. Roosevelt as the arbitrator. "The old Tory Morning Post proposed the president's name in advance of even the quick-witted German emperor, and the suggestion has been received with a chorus of acclamation by the English press. There are no ulterior motives. This English preference is based upon respect for the president's character and recognition of his unique fitness for the duties of an arbitrator in a case where a guarantee of payment or an award is urgently needed to act. The English press is regarding its sobriety of judgment respecting Germany. Mr. Asquith's outbreak is generally condemned, and the German emperor is beginning to have some sympathy for the president's desire to maintain the friendly relations with the United States. The British solution for the maintenance and preservation of the Monroe doctrine seems overruled when two powerful European governments have virtually recognized it and deliberately nominated the American president as arbitrator."

### GREAT BRITAIN CRITICIZED.

London, Dec. 23.—Speaking at Dunfermline tonight, Sir Henry Campbell-Simmerman said there was no cause for the government to have allowed Great Britain to "give" to the present position in Venezuela. "It is a pity quarrel," asserted the speaker, "with a quarrel, distracted and rocky state; if ever there was a case for arbitration, this is one."

Sir Henry strongly emphasized the importance of preserving the good will of the United States. He said it would require a case of the first importance to justify any action likely to alienate the good feeling and confidence of the American people entertained toward Great Britain. It was not enough to be on the best possible terms or avoid actual hostilities. It was essential to the policy of Great Britain to stimulate intimate friendship and any course which threatened in any degree the continuance of that perfect feeling of friendship or invalidated it to any extent was a crime not only against both great nations but against humanity itself.

### WELMER HEALING SCHOOL.

Wants Postmaster Enjoined from Interfering with Its Mail.

Kansas City, Mo., Dec. 23.—The American School of Magnetic Healing, known as the Welmer school, applied to Judge Phillips today for an order of injunction to prohibit the postmaster of Nevada from interfering with the delivery of mail to the school.

Two years ago the postmaster-general of the United States issued an order regarding this school, and the school's postmaster at Nevada withheld the school's mails. The school retained counsel to fight the order of the government. The injunction was asked for against the postmaster at Nevada, but it was denied in the United States court in St. Louis. The attorneys for the school appealed to the United States supreme court and there it was decided recently that the injunction prayed for should be granted, because the fraud order had been issued without full investigation by the government.

### Bernhardt Wins More Laurels.

Paris, Dec. 23.—Sarah Bernhardt playing at her own theater tonight, added a fresh laurel to her many laurels by the creation of the title role in "The Sign of the Cross," a new play by Paul Hervu, which deals with the career of a now forgotten woman, who, beginning as a courtesan, became a prominent personage during the reign of terror, and ended in a lunatic's cell.

The drama presents the outline of her own story, but the author has exercised the dramatic license to render her more sympathetic and interesting. The scene shifts from Vienna to Paris and a number of stirring scenes of the revolution are re-enacted with much realism.

### The Play Ends in the Salpêtrière Asylum.

where the mad woman evokes the phantoms of the celebrities whose heads she saw fall under the guillotine. It places many historic personages upon the stage, the distribution comprising sixty roles.

Bernhardt's impersonation of the heroine was warmly applauded by a typical audience of Parisian first-nighters.

There is a feeling of security, even though the baby is croupy or has a cold or whooping cough, when there is a bottle of Chamberlain's Cough Remedy in the house. Mothers of small children have learned that it can always be depended upon, that it is pleasant to take, and that there is not the least danger in giving it, even to babies.

The piece is superbly staged and presents an interesting revival of revolutionary Paris, with the picturesque costumes of the epoch.

### Young Woman Shoots Young Man.

Jackson, Tenn., Dec. 23.—Today at Toots station, a village near here, Miss Lizzie Hillhouse, a prominent young woman, shot and fatally wounded a young man named Marsh. She called Marsh from the breakfast table, seized him by the arm with her disengaged hand, and fired six shots from a revolver into his body. Marsh, it is claimed, was to have been married at an early date.

### Judgement Against Insurance Cos.

Knoxville, Tenn., Dec. 23.—In a suit in the chancery court a judgment has been given a local merchant against the Orient Insurance company of Hartford, Conn.; the Manchester Assurance company of England, the Phoenix Insurance company of Brooklyn, and the Virginia Fire and Marine Insurance company of Richmond, Va., for insurance plus 25 per cent penalty under a state law, which provides the additional bond on insurance companies if they fail to settle losses within 60 days' time after a fire. The insurance companies will appeal and attack the constitutionality of the law which makes them liable for the penalty.

### PEOPLE GETTING TIRED.

Of Poor Service of the New York Elevated Railroad.

New York, Dec. 24.—In connection with the agitation on the part of the people of New York to compel the elevated and surface railroads to furnish better accommodations, Mayor Low has written a letter to the president of the surface car companies, in which he asks why it is not practicable to run at all hours of the day and evening as many cars as are now operated during the rush hours, and why, during the crowded hours, two conductors should not be placed on every car, one of whom should be required to remain always on the rear platform. The mayor also suggests the vesting of the cars for the protection of the driver from the weather.

### A Weak Stomach

Indigestion is often caused by over-eating. An eminent authority says the harm done thus exceeds that from the excessive use of alcohol. Eat all the good food you want but don't overload the stomach. A weak stomach may refuse to digest what you eat. Then you need a good digestant like Kodol, which digests your food without the stomach's aid. This rest and the wholesome tones Kodol contains soon restore health. Dieting unnecessary. Kodol quickly relieves the feeling of fullness and bloating from which some people suffer after meals. Absolutely cures indigestion.

### Kodol Nature's Tonic.

Prepared only by E. C. DeWitt & Co., Chicago. The 8¢ bottle contains 1/2 times the 60¢ size.

### A. T. & S. F. Hospital Burned.

Albuquerque, N. M., Dec. 24.—The Atchison, Topeka & Santa Fe railroad hospital was burned by a typhoon of wind and rain which swept over the city last night.

## THE MYSTERIES OF ANTIQUITY.

Initiatory Ceremonies of Order of  
The Rising Sun Described.

### MRS. TINGLEY ATE FRUIT.

Then Related Wonderful Achievements of Her Dog Spot—Dr. J. A. Anderson Tells It All.

San Diego, Cal., Dec. 23.—In the Tingley-Times libel suit today the deposition of Dr. J. A. Anderson of San Francisco, once a member of the Tingley cabinet, was finished. Anderson described his initiation into the society of the lost mysteries of antiquity. He said all who were present sat on canvases and were supposed to be taking part in a very ancient ceremony. All were dressed in light muslin costumes and the rite was solemnized in the open air.

Describing the initiation Anderson said it consisted chiefly of Mrs. Tingley's telling of her dog Spot, and what the dog had done. Then Mrs. Tingley ate some fruit, which was supposed to be a very mysterious symbol and a part of the high initiation which was taking place.

Anderson then told how he was made a member of the Order of the Rising Sun—a son of the Rising Sun. The chief feature of this initiation was, he said, that each candidate held a sunflower. There was another order known as the Ancient Order of Scribes, which was very high.

Anderson related in some detail what Mrs. Tingley had said about the dog Spot. Mrs. Tingley, he said, had related how she was very blue and cast down and that Spot had gone to a heap of letters on the floor and picked out one from Dr. Allen Griffin which greatly comforted her.

In describing the ceremonies the deponent said there were a great number of them. In some those who took part went about barefoot, but they varied so that it would take much time to describe the ceremonies.

Anderson said when Mrs. Tingley went to welcome her visitors she wore a large purple robe that gave her a queenly appearance.

Describing the sacred costume, such as was worn to welcome a bride couple married at the home of Dr. Anderson, he said it was something like a skirt, but rather longer. "The one I wore," he said, "was like a wrap belted at the waist. Men and women wore about the same." All those who took part carried a light in their hands, which I advised parts and responses of the ceremony, which took place at night and was supposed to be one of great antiquity.

In reference to the food of the children, the deponent continued: "The little tots were fed principally on bread and milk. Light in the morning, I suppose. They seemed to have sufficient food, referring to those from a year to two years old. There was a class of new babies, those Mrs. Tingley told me, she had great trouble with, because of Dr. Woods (Mrs. Tingley's physician). He would not fall into line with her ideas as to food. She said he desired to have them fed while she desired to have them starved first, before they could more quickly kill out the lower animal nature in those children. This was done to relieve the little food and the doctor protested. This she told me directly and personally."

As to parents being separated from children, Anderson said: "I know of one instance in which they were separated. It was a matter of discipline." Parents were permitted to see their children once in two weeks. Of course, there were exceptions, but he said that was the rule. Mrs. Tingley's reason was that parental favoritism and parental interference with the proper development of the children was a matter to be avoided as much as possible.

Referring to the discipline of children, Anderson averred: "She takes away their food—that is, she orders them away from the table and orders them to cease eating if they do anything contrary to the rules. I have seen that and know that they were deprived of a meal for the time being. I did not watch very closely, because I was in two weeks. It was a matter of discipline almost to question her on any of her methods, or to observe things too closely."

Referring to the feeding of the babies, Anderson said: "I was going through the grounds once with Mrs. Tingley. We came to the babies and one was only a few days old. She was explaining the method of starvation—withholding the food. She said that in one case she withheld the food twenty-four hours. The child was about one year old. She said that the children's lower nature was subdued and broken, that the quickest way to bring it about was to adopt the course of withholding food until the child came to its senses—until its soul appeared."

In reply to a question touching the status of the institution at Point Loma, Anderson said: "Truthfully, it is not a theosophical society at all. It is a seceded movement from the theosophical society—a branch."

He said he left the Universal Brotherhood because Mrs. Tingley had substituted her will for the institution. As to writings that had been prepared for publication by Mrs. Tingley, he said they were rejected by Mrs. Tingley because he would not acknowledge her as divine, as others did.

### Perished in the Storm.

Kimball, Neb., Dec. 23.—John Gotte, a prominent ranchman, is believed to have perished in the recent storm. He left the ranch Friday to look for some stray cattle and has not been heard from since. His horse returned Sunday.

## PE-RU-NA IN THE HOME BRINGS SAFETY AND COMFORT.

A Letter From a Beautiful Albany Girl.

MISS  
SARA  
MCGAHAN.

Most of the illnesses that  
Come to the Human Family  
are the Direct Result of Colds.

MISS SARA MCGAHAN, 107 Third street, Albany, N. Y., writes:

"A few months ago I suffered with a severe attack of influenza which nothing seemed to relieve. My hearing became bad, my eyes became irritated and feverish. Nothing seemed right, and nothing I ate tasted good."

"I do not know what Peruna is made of, but I know it is a wonderful medicine to drive away sickness, and restore you to health. Within two weeks I was perfectly well, and now when any of my friends are sick I advise them to take Peruna."—Sara McGahan.

### A Cold is the Starting Point of One-Half the Diseases of Mankind.

It is through colds that most of the illnesses come to the human family. Our climate is responsible for most diseases. The ill effects of the climate first express itself through a cold. Immediately following the cold is a derangement of one or more of the organs. It may be in the head. It may be in the stomach. It may be in the pelvic organs, but somewhere in the body the cold is sure to settle.

If Peruna is used at this juncture, all trouble would be averted, but unfortunately many people do not use Peruna.

Some of them use some other remedy, and some of them use no remedy, and the cold is allowed to develop into influenza, (la grippe) or chronic catarrh. At this stage even of the disease, Peruna will cure, but of course it takes longer. Used in time Peruna never fails to break up a cold and thus avert a great deal of sickness.

The fact is Peruna should be in every household.

### A Family of Nine Protected from Catarrhal Diseases by Pe-ru-na.

Mrs. Fred Bartz, 700-3 Ivory avenue, St. Louis, Mo., writes:

"As long as we have had Peruna in the house we have not needed a doctor, and there are nine of us in the family."

### Holiday Dinners and Catarrhal Indigestion.

Christmas and New Years bring their joys long anticipated and heartily enjoyed. But the pleasure of holidays is not entirely unalloyed. The big dinners, the nuts and candies, the thousand and one delicious and rich viands that tempt the palate and seduce the appetite, are too well known to need mention. All this leads to deranged stomachs. Catarrh of the stomach is the immediate result. Gastric catarrh, the doctors call it. One or two doses of Peruna at the time prevent a long siege with catarrh of the stomach (generally called dyspepsia). What the doctors call dyspepsia, and the people call indigestion, is in reality catarrh of the stomach.

Holiday over-eating is not entirely confined to the children, either. The old folks sometimes do so, too. Whole families often suffer together. Catarrh of the stomach. That is the correct name for it.

Right here Peruna, the friend of the family, comes to the rescue. No family is exactly safe without Peruna. Nothing will take the place of Peruna. Insist upon having it and no other.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.
